

Omar Ashraf ElSeadawy

Building 110, District 4, North Lotus, Fifth settlement, New Cairo, Egypt.

Tel.: +201220119999 || Email: OmarElSeadawy@aucegypt.edu

Education

Masters of Science in Computer Science, The American University in Cairo (AUC), Egypt, September 2020 - June 2023.

Bachelor of Science in Computer Engineering, The American University in Cairo (AUC), Egypt, September 2015 - May 2020

- Graduated with Highest Honors, GPA: 3.9
- Senior highest GPA award, Spring 2018
- School of Science and Engineering Honors' Certificate, Spring 2019

IG Certificate, International School of Elite Education – New Cairo, Graduated: 2015

Work Experience

Software Engineer II | Microsoft — Bing Monetization / Ads UX | Cairo, Egypt

Oct 2022 – Oct 2024

- Develop and scale advertising experiences that serve millions of users across Bing Search, focusing on performance, usability, reliability, and monetization outcomes.
- Lead cross-team initiatives to simplify platform architecture, standardize user experiences, and improve engineering efficiency across multiple product areas.
- Drive end-to-end feature development from design and implementation through experimentation, launch, monitoring, and continuous optimization.
- Build reusable frameworks, automation tools, and engineering systems that accelerate development velocity and reduce operational overhead.
- Analyze large-scale telemetry and experimentation data to guide product strategy, measure impact, and improve user engagement.
- Contribute to security improvements and data infrastructure initiatives supporting critical business services.
- Own production excellence through incident response, root-cause analysis, reliability improvements, and proactive operational monitoring.
- Collaborate with stakeholders across engineering, product, design, and analytics teams to deliver scalable solutions aligned with business goals.

Graduate Teaching Assistant, Computer Science and Engineering Department, September 2020 - 2022.

- Computer Networks Lab: Responsible for explaining practical lab material and conducting experiments using GNS3.
- Fundamentals of Computer Science: Explain C++ concepts practically in the lab and supervise quizzes and assignments.

DevOps Developer, Synapse Analytics, September 2020 - September 2021.

- Provisioned and configured Azure virtual machines using Ansible
- Oversaw deployments of the product using Kubernetes, helm, and docker
- Maintained monitoring and observability tools using Prometheus, Alert Manager, and Grafana
- Managed bare metal Kubernetes cluster using Kubeadm, Ingress, Cilium, Longhorn, and Rook.
- Deployed CI/CD pipelines (Gitlab CI, Azure)

Software Engineering Intern, Siemens EDA [Mentor Graphics], Feb 2020 - Aug 2020.

- Tested the whole software process starting from customer request up until delivery.
- Experimented with D2S Pattern Matching flows using different scripting languages and analyzed the results to provide insight to the team.

Software Developer Intern, Tech Labs London, July-August 2019.

- Created 'iProperty Cloud AI Chatbot' by using Microsoft Azure AI Cloud, Dynamics 365 Customer Engagement Platform, and Microsoft Flow.

Machine Learning/Software Engineering Intern, Synapse Analytics, January 2019.

- Constructed a software platform using Django that integrates Face Recognition Model that uses Facebook's Facenet, Person Re-Identification, and Fire Detection Model that utilizes ConvNet and OpenCV.

Intern Developer, Arab International Optronics, Summer 2018, two weeks internship.

- Designed a Financial Software system that handles salaries and expenses of the company along with the accounting department.
- Developed the software using C# and SQL for the database.

Volunteer Undergraduate TA for Digital Design I Course, AUC, Fall 2017.

- Instructed students in lab sessions on debugging techniques and Digital Design concepts.

Embedded System Development, Internship with Center of Nanoelectronics AUC, Summer 2017.

- Development, Design, and Assembly of PCBs from Hardware Components.
- Software Development on Arduino Nano.

Academic Projects

- ElSeadawy, O. (2023). Mixed-Criticality Scheduling Using Reinforcement Learning [Master's Thesis, the American University in Cairo]. AUC Knowledge Fountain
- Thesis project: Social Lens; Social Media Aggregation, Deduplication, and Personalized Recommendation, September 2019 - May 2020.
- Implemented distributed peer-to-peer image sharing system using C/C++ in Distributed Systems.
- Computed Hierarchical Router with A* Algorithm using C++ in Digital Design II.
- Developed Image Captioning Model in Practical Machine Deep Learning.

Extra-Curricular Activities

Computer Science and Engineering Association Academics Director, Spring 2019.

- Supervised Core, Teaching, and Freelancing Committees.

Member Housing Committee in Volunteers In Action, AUC, 2018-2019.

- Responsible for helping Orphan brides in preparing them for marriage.

Member Entertainment Committee in Computer Science and Engineering Association, AUC, Fall 2018.

- Prepared and supervised events to entertain the department's students.

Student Senator for the Computer Engineering Department, 2018.

- Member of the Legislative Committee, Spring 2018.

Head Teaching Committee in Computer Science and Engineering Association, AUC, Fall 2017

- Governed Undergraduate TAs and made sure they helped all the students in need.

Competitions

ODEM Blockchain Code-a-thon in Blockchain summit at AUC in Spring 2019.

- Devised an idea that uses blockchain to solve car violation recording issues in Egypt.

Emirates NBD Competition Member, December 2018 - February 2019.

- Formulated a pitch for the bank that included business and technology (machine learning, data analytics).

ECPC (Egyptian Collegiate Programming Contest) ACM Nationals Competition.

- Solved competitive programming problems

Amazon Alexa Hackathon, AUC, Spring 2017.

- Designed a voice artificial intelligence application

Skills

Languages: Fluent in English and Arabic, both speaking and writing.

Computer: Fairly Familiar with Linux Operating System and Shell commands. Capable of using Windows operating systems and MS Office Applications at an advanced level.

Programming Languages: Skilled in C, C++, C#, ASP.NET, HTML/CSS, JS and Python.
